DMC1000 - Deckadance MIDI MAPPING

Dear customer,

If you are using Win Vista or Win7, please first read the file called
"README 1ST for WIN7+VISTA USERS.txt" in this ZIP-file.

Deckadance doesn't have separate MIDI MAPPER files, all supported controllers are added
in the new versions of Deckadance. In this way your are sure that the Software is tested and
perfectly adapted to the your controller.

The Synq DMC-1000 is supported from Deckadance version 1.71 and up.

To download the newest version please go to the links below:
- WINDOWS version: http://windemo.deckadance.com/
- Mac OSX version: http://macdemo.deckadance.com/

Please note that these are fully functional demo versions (limitation = every 3minutes there's
a 5sec silence)
- **Registered users:**
  the demo will automatically unlock, if not please introduce your personal unlock code.
- **Unregistered users:**
  to unlock the demo version you can buy Deckadance via: http://shop.image-line.com/

Getting started manuals can be found here:
 http://deckadance.image-line.com/downloads.html

Video tutorials are available on:
http://support.image-line.com/videotutorials/

Full Forum support available (requires forum registration)
http://forum.image-line.com/index.php?c=2

Enjoy and don't hesitate to post your mixing-skills on YouTube!
